

## Transportation Endorsement Course Outline

### Module 1

#### INSTRUCTIONAL OBJECTIVE

The participant will be able to demonstrate patient handling techniques with spinal precautions to initially move an injured worker. The procedures will follow the techniques described in the Occupational First Aid Level 1 Training Manual.

#### Learning Tasks:

##### Course introduction

- ◆ the course format

##### Responsibilities for work site preparedness

- ◆ advantages and requirements of emergency preparedness in the workplace
- ◆ role and responsibilities of the first aid attendants in the transportation of injured workers

##### Evaluation of work site emergencies

- ◆ the priority action approach
- ◆ mechanisms of injury capable of producing spinal injury

##### Patient management

- ◆ conduct a primary survey
- ◆ move a patient from sitting to supine
- ◆ move a patient from prone to supine

## Module 2

### INSTRUCTIONAL OBJECTIVE

The participant will be able to prepare patients for transport in the supine and lateral positions. The procedures should not take longer than 15 minutes from the approach to the patient and will follow the guidelines in the Occupational First Aid Level 1 Training Manual.

#### Learning Tasks:

##### Patient packaging and immobilization for transport

- ◆ the purpose of patient packaging and immobilization for transport
- ◆ equipment needed
- ◆ patient positioning for transport
- ◆ securing techniques

##### Prepare a patient for transport

- ◆ apply a hard collar
- ◆ position and secure a patient to a spine board in the supine position
- ◆ position and secure a patient to a spine board in the lateral position

## Module 3

Review the concepts and procedures from modules 1 and 2

#### Learning Tasks:

Instructor to evaluate the student's performance to assess if the student will achieve certification
