

SAFE NEEDLE INFORMATION SESSION

Thursday, January 31, 2008, 3-5 p.m.

WorkSafeBC Auditorium
6951 Westminster Highway, Richmond

As of January 1, 2008, safety engineered needles are mandated under changes to the Occupational Health and Safety Regulation. WorkSafeBC's Industry & Labour Services Healthcare group is hosting an information session to bring together key stakeholders (including employers, unions, suppliers, professional associations, and educational institutions) to review compliance under these new requirements.

This two-hour session will include a summary of the changes, and an overview of what compliance looks like. There will be ample time for questions and answers.

If you are interested in attending, email: indlabsr@worksafebc.com by Friday January 25th. An agenda and other additional information will be sent out by email to confirmed attendees on January 29th.
